-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

- 6) ☐ Other: ____.

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because on page 1, lines 21+, the reference to figures 1a2), etc do not match that shown in the drawings, please delete the closing parentheticals ")" from each. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claims 5-9 are objected to because of the following informalities: on line 6+ of claim 1, "or in connection with its outlet to form a seal..." is vague and unclear, how does a bend create a seal. In this alternative format; it is unclear if this element or the prior "bend" or "loop" is being claimed. Also, although applicant is allowed to be their own lexicographer, loop is taken to mean a closed path that starts and ends at the same point, like a circle, which is not disclosed. Phrases like "is designed to" should be deleted since they are vague and unclear as to what is the meets and bounds of the claim. In claims 8-9, the phrase "after it" is unclear as to upstream or downstream and from which element this is relative to. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3671

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder et al 4,705,114. Schroeder shows a pipe separator 74 (fig 4) for the separation of fluids, for example separation of oil, gas and water in connection with the extraction and production of oil and gas from formations beneath the sea bed, comprising a pipe-shaped separator body (fig 4) with an inlet and outlet that principally corresponds to the transport pipe (36, 19) to which the pipe separator is connected, wherein a pipe bend or loop (indicated at ref numeral 74 in fig 4) is arranged in the pipe separator 74 or in connection with its outlet to form a downstream fluid seal in relation to the pipe separator, which is designed to maintain a fluid level in the pipe separator, but which also allows the pipe separator and the loop to be pigged (col 3 lines 60+).

As concerns claim 7, Schroeder shows a bypass pipe (71) for gas is designed to conduct gas around the fluid seal and that the inlet of the pipe (19) is connected to the pipe separator upstream of it, while the outlet is connected to the transport pipe downstream of the pipe separator (fig 4).

Allowable Subject Matter

5. Claims 6, and 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
